the magnitude required to meet the needs of the intended user of the GHG statement.

### Verification approach

SGS's approach is risk-based, drawing on an understanding of the risks associated with reporting GHG emissions information and the controls in place to mitigate these. Our examination includes assessment of evidence relevant to the amounts and disclosures in relation to the organization's reported GHG emissions.

### What we

do

"We provide independent assurance services to help organizations improve their performance and reduce their environmental impact. Our services include auditing, consulting, and certification. We are committed to providing high-quality, reliable services that meet the needs of our clients and the wider community."
